Dear Philip,

We recently completed the installation of the Saint Michael's Compass Rose and would like to tell you that your company did a great job. The waterjet cutting on the marble and granite pieces were to the utmost precision. The work turned out to be a masterpiece. It seems like more and more projects have specialty cutting on them and not many companies have the knowledge and ability to produce this type of work and certainly not to the precision that was apparent on the Compass Rose. Thanks for the great work. DBI looks forward to working with Waterjet Works in the future and also passing your information along to owners and architects who are wanting a great product.

Sincerely,
DEE BROWN, INC.
